

## **Extract from Latest Planning Practice Guidance issued by MHCLG 24<sup>th</sup> July, 2018**

### **Should a viability assessment be publicly available?**

Any viability assessment should be prepared on the basis that it will be made publicly available other than in exceptional circumstances. Even in those circumstances an executive summary should be made publicly available. Information used in viability assessment is not usually specific to that developer and thereby need not contain commercially sensitive data. In circumstances where it is deemed that specific details of an assessment are commercially sensitive, the information should be aggregated in published viability assessments and executive summaries, and included as part of total costs figures. Where an exemption from publication is sought, the planning authority must be satisfied that the information to be excluded is commercially sensitive. This might include information relating to negotiations, such as ongoing negotiations over land purchase, and information relating to compensation that may be due to individuals, such as right to light compensation. The aggregated information should be clearly set out to the satisfaction of the decision maker. Any sensitive personal information should not be made public.

An executive summary prepared in accordance with data standards published by government and in line with the template (template to be published in autumn 2018) will present the data and findings of a viability assessment more clearly so that the process and findings are accessible to affected communities. As a minimum, the government recommends that the executive summary sets out the gross development value, benchmark land value including landowner premium, costs, as set out in this guidance where applicable, and return to developer. Where a viability assessment is submitted to accompany a planning application, the executive summary should refer back to the viability assessment that informed the plan and summarise what has changed since then. It should also set out the proposed developer contributions and how this compares with policy requirements.
